DiLCo ('Digital language variation in context') is a 3-year international research network initiated in 2021 by Jannis Androutsopoulos and Heike Zinsmeister at Universität Hamburg. The network brings together researchers with expertise in computational and interactional approaches to digital language and communication research. It aims to provide a platform for interdisciplinary synergy and early-career capacity building.

DiLCo is funded by the Federal Ministry of Education and Research (BMBF) and the Free and Hanseatic City of Hamburg under the Excellence Strategy of the Federal Government and the Länder.
