AND SOCIETY (CLICCS)

2. CLICCS CONVENT ANTICIPATING CHANGES

Anticipating Changes: Flood Risk Anticipation and Communication in the Alps

The CLICCS Convent is a central element of our cluster of excellence, taking place once a month during the semester. Each Convent will focus on a particular cross-cutting theme or salient subject of current political debate. Depending on the topic, it will take different formats, producing specific output that advances our CLICCS research progress.

This second Convent features a talk by Prof. Dr. Roberto Poli about anticipation, and its theoretical implications, thereby drawing on the experience of the project LIFE FRANCA. Poli is UNESCO Chair in Anticipatory Systems and the author of numerous books and articles on anticipation. He teaches Social Foresight and Epistemology of the Social Sciences.

Guest speaker: Prof. Dr. Roberto Poli

University of Trento, Italy
